### Water Update 1/07/2020

Cimarron Public Works and Mayor Leo Martinez met with Joe Savage and Michael Peterson of NMED January 7, 2021 to discuss the updates and plant data. The plant is maintaining the data within the State Regulated requirements. Mr. Savage reported they would like to see these numbers maintained for at least one week to two weeks before they will consider resolving the water violations.

The Public Works and Mayor Leo Martinez are meeting daily to review the daily data at the Water Plant and are conducting jar tests weekly to ensure the levels of Alum mixture are being maintained. These tests are done to determine the amount of alum needed to remove the turbidity that our water requires to maintain the NM State Regulations.

The State has submitted one additional form for data recording in which the Public Works and Mayor Martinez will submit monthly to NMED.

The Governing Body will meet on January 13, 2021 in regular meeting to discuss the water updates.

Kirk Davis has been diligently working on the removal of the silt at the diversion and has been successful in removing silt from one manhole and is currently working on the other. This process is necessary to determine the conditions of the piping and the needed repairs to this facility so the Village can obtain the river water. The Public Works Department has been assisting Mr. Davis in this task and providing man-power and equipment when requested.

AnchorBuilt of Albuquerque is the contractor that was awarded our Water Plant Rehabilitation Project and they have been mobilizing at the Water Plant. The Village will be getting a new Water Plant in the upcoming months and the contractor is on schedule.

If you have any questions please don't hesitate to contact the office at 575-376-2232 and if I am unavailable please leave a message and I will return your call.

Thank You for your cooperation,

Shawn Jeffrey, Administrator
