Water Update 12/23/2020

Yesterday 12-22-20 from 10:00-3:00 Cimarron Public Works, Mayor Leo Martinez, Mayor Pro Tem Laura Gonzales, Councilor James Gallegos, Admin Shawn Jeffrey, NMED-virtually, and the Raton Public Works operators met at the Water plant to run the process of jar tests. These tests are done to determine the amount of alum and/or polymer that our water requires to be within the NM State Regulations. The tests were run three times today and the data was recorded and the formula was implemented which the end result was an increase of Alum is necessary to help to regulate the turbidity. We will begin to put the water storage tank online in the upcoming days to see if this will also provide an additional method of settling the water.

The governing body will be meeting on Monday December 28 at 6:00 to discuss the Water Updates. NMED Joe Savage will also be attending the meeting. The agenda will be posted tomorrow December 22, 2020

The monthly sample that was submitted for the month of December did pass all perimeters for the water quality. Although these samples all passed, we continue to be under the boil water alert for the water turbidity levels.

Anchorbuilt of Albuquerque is the contractor that was awarded our Water Plant Rehabilitation Project and they will be mobilizing in the upcoming weeks at the Water Plant. The Village will be getting a new Water Plant in the upcoming months.

If you have any questions please don't hesitate to contact the office at 575-376-2232 and if I am unavailable please leave a message and I will return your call.

Thank You for your cooperation,

Shawn Jeffrey, Administrator
